

# TABLA GENERAL DE LAS CITAS DE ALKINDI Y ALFARABI EN LAS OBRAS DE SAN ALBERTO MAGNO

Al elaborar nuestros trabajos sobre el influjo de Alkindi y Alfarabi en San Alberto Magno, aparecidos en *La Ciencia Tomista* (1) y en *Estudios Filosóficos* (2), hemos ido tomando nota de todos los lugares donde el Santo cita, *de modo explícito*, a dichos filósofos.

Por si este índice puede ser de algún interés y ahorrar algún trabajo a otros estudiosos lo damos hoy a la publicidad en tanto los competetivos investigadores alemanes que se han propuesto realizar la edición completa de las obras de San Alberto, nos ponen entre las manos sus volúmenes dotados de índices análogos definitivos. Citamos por la edic. Borgnet (B.), París, 1892-1899.
